

08 Information for end-users

Information for end-users

Ease of use at participating institutions

This table publicises the ease of use of eduroam deployments in an effort to improve the adoption and quality of service to end users. This league table orders eduroam deployment in Australia by the [ease of use](#) of the deployment and [coverage](#) - to highlight the need to improve and provide a highly usable eduroam service.

The details below refer to services that visited institutions provide to guests. Institutions may choose to use the same SSID "eduroam" for their own users (own users at home institution), the service may be different to comply with institutional policies. In the latter case, those details are not listed here, please refer to your home institution's eduroam support team for more details.

It is hoped that all eduroam deployments in Australia will strive for a 5 tick rating.

Note: The institutions are ranked primarily by "ease of use" and then a subcategory of "coverage", where the institutions share the same ticks for both the highest listed institution is the latest one to each that level.

Organisation	Site	Ease of Use	Coverage	Local Support Information
AAO	Head Office, Delhi Road, North Ryde Anglo-Australian Telescope, Siding Spring			Under development
AARNet	Canberra Melbourne (SSID as eduroam-aarnet due to RMIT SSID eduroam overlap) Perth Sydney			Support
ACU	Ballarat Brisbane Canberra Melbourne North Sydney Strathfield			Support
ANSTO	Lucas Heights			Support
ANU	At ANU, eduroam is available where ever you find ANU-Access and ANU-Secure			Support
