

eduroam_cisco1200-setup

Cisco 1200 Series Access Point setup for eduroam

This guide assumes that the basic VLAN and RADIUS setup is complete.

Step 1

Under Security, Encryption Manager.

- Select VLAN in drop down box under Set Encryption Mode and Key for VLAN.
- Select Cipher in Encryption Modes.
- Select TKIP in Cipher drop down box.
- Clear Encryption keys.
- Select Encryption key 2.

Step 2

Under Security, SSID Manager.

- Select eduroam SSID.
- Under Authentication Settings, Methods Accepted.
- Select open Authentication with EAP in the drop box.
- Select Network EAP.
- Under Authentication Settings, Server Properties.
- Select Customize.
- Under Priority 1 select your RADIUS servers address.
- Under Authenticated Key Management
- Select Key Management Mandatory
- and Tick WPA
